Providing Cloud Based and Affordable
Library Management Solutions for Legal Libraries

Cains

KEEP IT SIMPLE WITH SOUTRON'S LEGAL LIBRARY MANAGEMENT SOLUTION

CHALLENGE

Cains Advocates, based in the Isle of Man, are an independent international law and professional services group. Cains are at the forefront of the development of the Isle of Man as an international finance centre.

They offer specialist legal services to international and domestic clients. They also provide Isle of Man legal expertise and regularly co-ordinate the provision of advice and the management of multi-jurisdictional transactions. Their lawyers work closely with metropolitan professional advisory firms with regard to company incorporations, transactions, restructuring and related corporate activities.

After using the same system for over 10 years, installed only on their local computers, through the demand on internal IT resources and the complexity of a legacy system, Cains felt it was time to look at the marketplace for a new solution more suited to their current needs. It was time to upgrade to a more personalised web based system.

Kristie Jelfs, Law Librarian at Cains said, "We were looking at the marketplace and we felt it was time to upgrade either our current system or look for a better alternative".

SOLUTION

After looking at several other software suppliers for a new legal library management system, they chose Soutron.

A key benefit of choosing Soutron is the fact that all upgrades and support for the system is managed entirely by Soutron staff. Kristie says "with the new Cloud Based Soutron LMS, this is all taken care of and our own IT department are now a lot happier as a result".

"The Search Portal is really easy to use. We love the customisation that it brings and we can perform every function through the web browser. Compared to many other systems, it was also very affordable, (including hosting). It really fits our needs".

RESULTS

"We love how easy it is to upload catalogue records. It has been very simple for us to setup our statutory documents and separate our journals." The simplicity of Soutron has made life easier and more productive so the Library can spend more time serving lawyers and their clients.

The reassurance of knowing Soutron's staff understand legal libraries was a significant factor in choosing Soutron, who have librarians with years of experience working in a law library on the Soutron team.

> **"Easy to use, cloud based and affordable. It really fits our needs for a legal LMS"**

> Kristie Jelfs,
> Law Librarian
> Cains Advocates

After several months of using the system Cains have not needed to call on the Soutron Support team for anything.

Kristie says "The system is so simple to use and the documentation provided is very clear and easy to understand but it's very comforting to know that expert help is at hand if we need it."
