

Ethiopian National Archives and Library Agency select Soutron & MAKE Enterprise for New Library, Archives and Records Management Solution

Derby, United Kingdom – Soutron are delighted to announce authorised business partner in Ethiopia, MAKE Enterprise, have been for the last two years working towards a new solution for the National Archives and Library Agency of Ethiopia.

After a thorough tender process, the software provided by Soutron was chosen to help the National Archives and Library Agency of Ethiopia manage their extensive collections, archives and records.

The new web-based application with multiple Search Portals and extensive and highly customisable administration features will offer the national organisation a multitude of features to help staff manage all types of resources and provide public access to library and archive materials.

NALA IT department require web systems and architectures and sought a solution with the flexibility to meet the needs of the entire organisation. NALA information professionals are looking forward to having improved workflows to assist them manage their extensive acquisitions, cataloguing and record management processes.

Endale Mekonnen, Chief Executive Officer at MAKE Enterprise speaks very highly of the partnership between Soutron and MAKE Enterprise “From our very first communication of enquiry in 2017 with Graham Beastall, Managing Director at Soutron, it was clear that the transparency and level of detail in Graham’s reply to initial questions provided me with 100% confidence in their support of a totally modern solution.”
