

SOUTRON INTEGRATED LIBRARY SYSTEM (ILS) – GO BEYOND LIBRARY

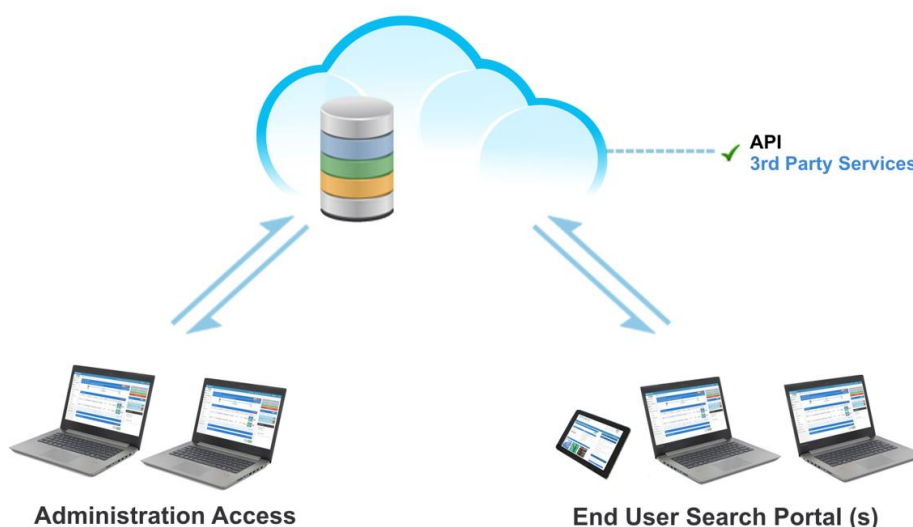

Soutron’s web-based Integrated Library System engages patrons by providing self-service functionality, encouraging collaboration and the capture of feedback and comments.

It reduces the pressure on library staff and increases access to knowledge from any device including mobile smart phones and tablets.

- Built on over 30 years’ of library and knowledge management expertise
- Out of the box, easy to customize, flexible to adapt to future needs
- Continuously developed, fully managed and supported
- Driven by our passion to provide the best Library Management service

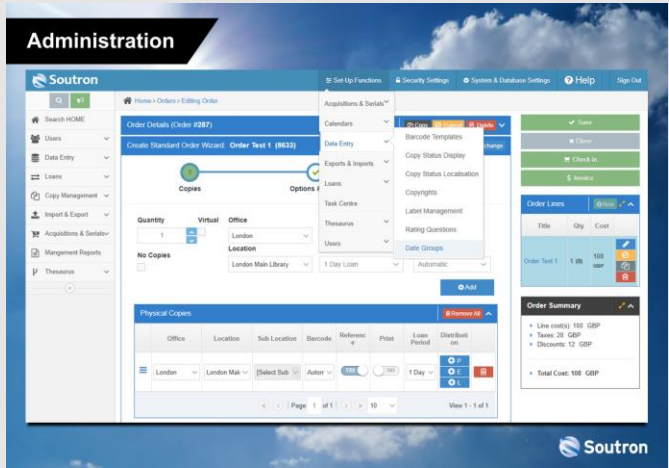

Soutron Integrated Library System is engineered to take full advantage of new web technologies including HTML5 leading to improved performance and greater flexibility in presentation of results across all types of devices.

Fast Cloud Based and Mobile Friendly Library Management Software

Search Portal for end user patron access

Administration pages for library staff

SEARCH PORTAL

Soutron’s continually evolving and enhanced Search Portal, is supremely flexible and easy to customize with hierarchical tree navigation, related records, control over layout and content presentation and superior performance.

Soutron is a multi-purpose application, where the database can:

- store data for library - plus archives and knowledge
- manage physical items, PDFs & documents and digital content
- streamline workflows for each application
- catalog video, image, audio and ePUB file formats
- capture and process data manually, via scanners, via automated loads
- present information on desktop and mobile devices in a responsive web browser layout

Single or multiple search portals are easily created to cater for the information needs of discrete user communities. The library is able to direct content to the patrons that it serves and present web pages with appropriate content and links to internal or external resources.

SOUTRON IS FAR MORE THAN A LIBRARY SYSTEM

Soutron is a comprehensive solution for organisations large or small, with the facility to apply rich functionality across all aspects of library and archive work within one flexible database.

Simply put, it offers better value for money because it can do more than a legacy library system, it takes full advantage of the latest web technology and offers a simple unlimited user licence.
